

## Year 5 Stargazers Visit Jodrell Bank!

Year 5 visited Jodrell Bank as part of their 'Stargazers' science topic. Below is Rabia's letter of thanks to the staff who hosted our young astronomers.

### Thank you Jodrell Bank

Thank you for everything Jodrell Bank. All of us had an amazing time enjoying your lovely hands-on experiences. We have learned so much from the workshops such as the planetarium, the experiments and the gift shops.

One of our favourite things was the planetarium. We loved that we could see the sky and that the Romans had a theory about the star  $F$  joined altogether. As well as this, we especially liked that we learnt which directions the sun moves.

We also really liked the experiments. The thing we loved most about the experiments is that we held a real meteorite (shooting star) which is over 4 billion years old! In addition to this, we learned a lot about rocks and how we can tell them apart. The other experiment we liked ~~were~~<sup>was</sup> testing to see if the sand was an alkali, whether it was acidic or if it was neutral.

The gift shop was another one of our favourite things about the trip. We only had up to £5 with us but we had so much things to buy and to choose from.

Because of all these amazing things you have done for us, SS wants to thank you for all your hard work. We hope to see you again soon.

The best of luck in the future,  
Rabia, SS.
